

CLOSED CASH HANDLING

SECURE INNOVATION

PART OF THE GUNNEBO SAFEPAY RETAIL SOLUTION.

iBox SafePay.

An integrated component of the Gunnebo 'closed cash cycle' retail solution. It captures the cash deposited and holds it until the iBox SafePay is collected and emptied.

With SafePay's end-to-end security, there is no access for retail staff to open the iBox. This reduces operator errors, saves time and protects cash from shrinkage and internal fraud.

THE VALUE.

The iBox SafePay solution offers:

Secure, reliable cash storage and transportation.

Intelligent deterrent against external attack and internal fraud.

Reduces time and operating costs.

Enhanced staff security and safety.

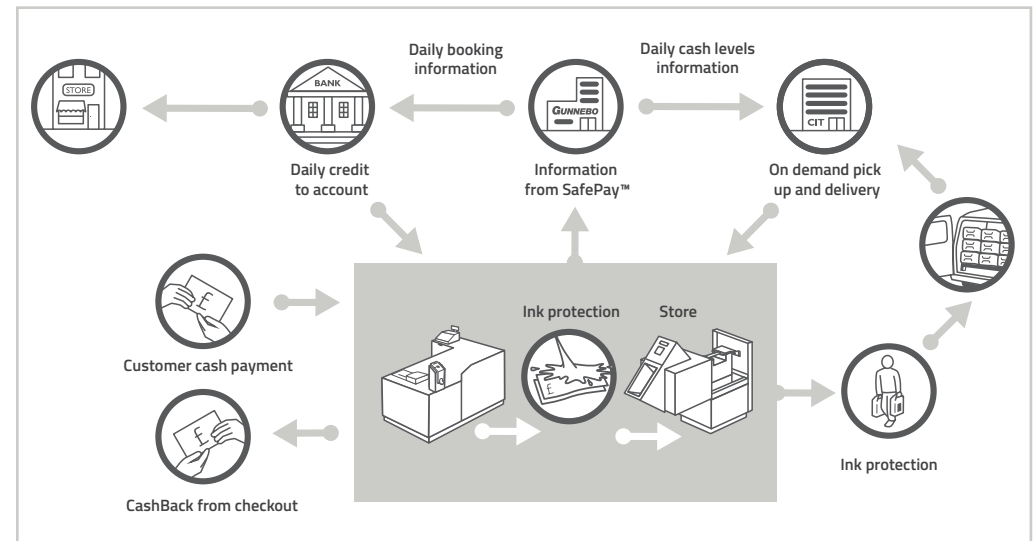

SafePay SOLUTION.

Spinnaker technology protects the cash at all points from the back office to the cash centre.

Gunnebo SafePay counts the cash into the closed loop. The cash is transferred via the Cash Transfer Unit from the point of sale to the SCL unit in the back office. The cash is counted directly into the iBox through an automated note acceptor. When a pre-defined limit is reached, a cash in transit collection request is made.

The CIT guard exchanges the full iBox for an empty unit and the collected iBox is opened at the cash centre where it is remitted to the customer's account.

By automating the counting process, errors are eliminated and the retailer can receive crediting to their account within a few hours. The cash values are tracked at all times throughout the process.

THE FEATURES:

Simplicity, reliability and versatility are the key features of the iBox SafePay.

END TO END CASH PROTECTION.

FUNCTIONAL FEATURES:

- SCL note acceptor
- Secure access control
- Visual indicators
- Sounder
- Ergonomic grip
- Air transportable
- 20C to +60C operational temperature range

SECURITY FEATURES:

- Ink degradation of box contents
- Anti-cut liner
- Liquid detector
- Movement sensors
- Transport timers
- Black box recorder with time/date stamps

| SPECIFICATIONS | iBox SafePay |
|----------------|--------------|
| L (mm) | 617 |
| W (mm) | 317 |
| H (mm) | 162 |
| Weight (kg) | 10 |
| Capacity | 3000 |

OPTIONS

- Tracking - full satellite, GSM & RF tracking of iBox
- DNA and Trace markers - supplied on request
- Remote Control - RF and GSM
