SECURE INNOVATION

# INTELLIGENT MEI SCL CASSETTE PROTECTS CASH AT THE RETAIL POINT OF SALE

## THE PRODUCT.

This OEM approved, space-saving cash deposit cassette is built for the MEI SC Advance note acceptor.

r2m is a smart solution that protects cash whilst being transported and stored at the retailer's premises.

## THE VALUE.

### The r2m solution offers:

An intelligent deterrent to loss risk and shrinkage.

Versatile operating process.

Opportunity to reduce operating costs.

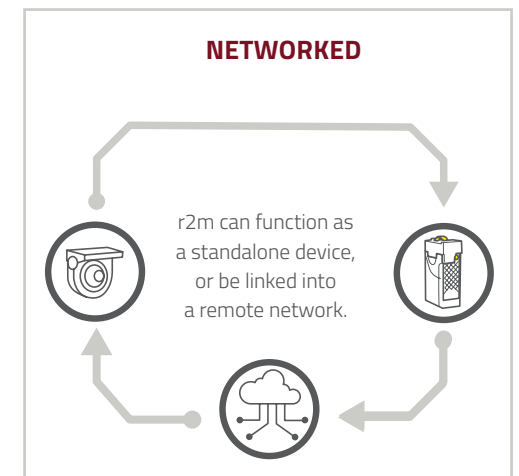

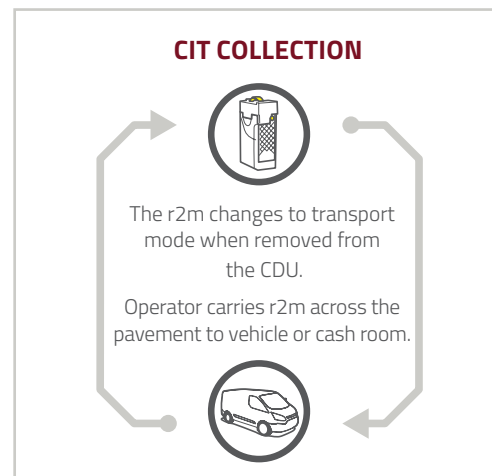

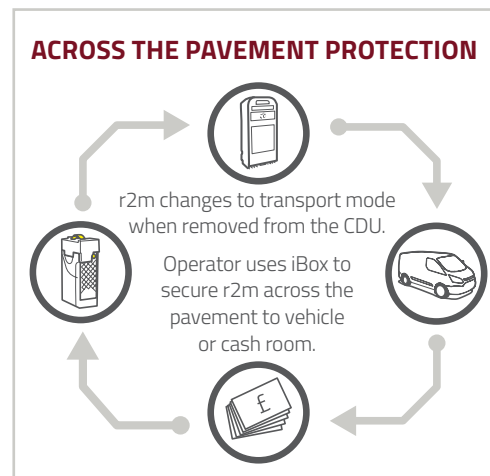

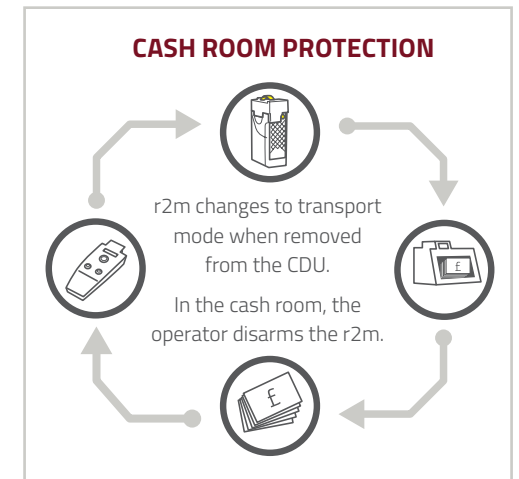

OEM approval.

## PROCESSES.

Retailers must protect their employees and cash. Both are at risk at the point of sale and when transporting cash.

The r2m provides a complete solution to retail security, and reduces cash handling errors.

With it's small footprint, the r2m is compact and totally secure, changing mode automatically when removed from the Cash Deposit Unit (CDU). It senses and responds to attack by staining the cash with indelible security ink.

## THE FEATURES:

Simplicity, reliability and versatility are the key features of r2m.

## RELIABLE, VERSATILE, SMART CASH PROTECTION

### FUNCTIONAL FEATURES:

- 5yr battery life
- Secure access control
- Visual indicators
- Alert sounder
- Low profile design
- 20C to +60C operational temperature range
- Compatible with SC Advance note acceptors

### SECURITY FEATURES:

- Ink degradation for total cassette contents
- Anti-cut liner
- Liquid detector
- Movement sensors
- Transport timers
- Black box recorder with time/date stamps

**BENEFITS OF r2m**

FEATURE	ADVANTAGE	BENEFIT
SAFETY	Spinnaker technology guards cash, reduces conflict risk. No pyrotechnics or explosives.	Reduces risk to public and staff. Passive and safe note degradation.
SECURITY	Ink degradation stains cash. Sensors can detect physical attacks and tampering.	No reward principle acts as a deterrent. r2m can detect attacks and respond autonomously. Reduces shrinkage risk.
SIMPLICITY	Works automatically with MEI SC advance acceptor.	Reduces need for staff training. Fewer handling errors.
RELIABILITY	Established technology with OEM approval. Over 50,000 Spinnaker products in use in more than 30 countries.	Proven reliability. Minimal service needed.
MANAGEMENT CONTROL	Black box recorder allows analysis of over 2000 events. Programmable operating process.	Efficiency of service process can be measured. Enforces security procedures.
COST EFFICIENCIES	Reduced CIT crew size. Long lifespan and fixed service schedule.	Enables smaller footprint and cost at point of sale. Low total cost of ownership.
