

LEADING TECHNOLOGY DEVELOPED BY SPINNAKER TO PREVENT ATM EXPLOSIVE GAS ATTACKS SAFELY.

An innovative system designed and made in the U.K. to detect and suppress ATM gas attacks, as well as alerting your designated security team for a quick response and recovery.

PREVENTION

Sensors detect a gas attack and immediately release the suppressant, with the option to send silent radio alerts to your security system at the same time.

UNIVERSAL

The **core** unit simply slides into an ATM cassette position. There are no installation or set-up costs, and no training is required. **core** is compatible with all major ATM machine types.

PORTABLE

As **core** requires no fixed installation within an ATM, the **core** cassettes can easily be moved from one ATM to another in response to potential risks and attack intelligence. Making it the most cost-effective solution on the market.

SIMPLE

Installation can be performed in minutes by bank employees or Cash Management providers at the same time as ATM replenishment.

SAFETY

The non-combustible suppressant is designed to neutralise explosive gases with no risk of ignition and no harmful substances.

REMOTE

core can function independently or integrate into existing alarm systems. Optional functions include auto reporting, status updates and remote activations when used with **a2m**. The **core** has an internal Black Box that records time, date, attack and attempted attack data.

POWER

Internal rechargeable batteries offer complete flexibility, or **core** can be permanently powered in the ATM by mains supply with the battery as a backup.

RELIABLE

Core requires an annual calibration check, and servicing only once every five years.

VALUE

A flexible, cost-effective solution which eliminates potential ATM attacks, removes the risk of damage to your ATM estate and buildings, and protects people.

AN EASY TO FIT, PORTABLE SOLUTION, WITH NO TRAINING & NO INSTALLATION COSTS.

FITS ALL MAJOR ATM MACHINES

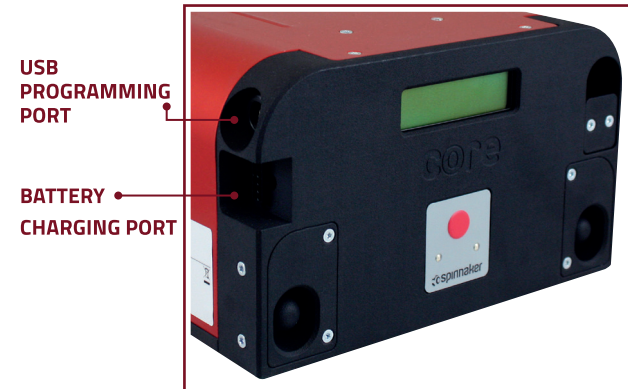

CAN BE MOVED FROM ONE ATM TO ANOTHER IN RESPONSE TO LOCATION RISK ANALYSIS.

NO NITROGEN GAS GENERATOR, REMOVES IGNITION RISK.

A UNIQUE PATENTED SOLUTION.

NON-FLAMMABLE GAS SUPPRESSANT WITH NO HARMFUL SUBSTANCES.
